

Supplementary Figure S1. One simulated participant's record (intravenous pembrolizumab arm)

Baseline

age: 60.1
sex: male
race: white
ethnicity: not hispanic or latino
ecog performance status: 0
weight: 67.8
height: 146.5
body mass index: 31.6
body surface area: 1.7
hemoglobin: 8.1
heart rate: 97.2
systolic blood pressure: 141.8
diastolic blood pressure: 70.4
creatinine clearance: 35.9
left ventricular ejection fraction: 60.5
smoking status: former
diabetes: no
non small cell lung cancer diagnosis: squamous
tumor histology: other
region: Rest of the World

Every visit, administration, adverse event, assessment and exit is generated from the protocol and registry evidence.
